# **Codebook**

This codebook describes the variables in a dataset that examines variation in state, county, and city laws and policies implementing complete streets. This dataset includes the 40 largest cities, their respective counties, 25 states and the District of Columbia. This dataset is cross-sectional, capturing currently effective law valid through May 1, 2020.

There are three standard variables in every MonQcle dataset. They are:

### **JURISDICTION:**

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

### **EFFECTIVE DATE:**

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

### **VALID THROUGH DATE:**

This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

**Questions**

Question 1:	<b>Is there a Complete Streets Policy?</b>
Question Type:	Binary - mutually exclusive
Variable Name:	HCCS_Policy
Variable Values:	0, 1
Value Label:	0 = No
