Codebook

This codebook describes the variables in a dataset that examines variation in city laws and policies adopting healthy food procurement. This dataset includes the 40 largest cities. This dataset is cross-sectional, capturing currently effective law valid through May 1, 2020.

There are three standard variables in this MonQcle dataset. They are:

JURISDICTION:

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

EFFECTIVE DATE:

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

VALID THROUGH DATE:

This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.
